CF35 TREKGUARD WATERPROOF BOOT

DESCRIPTION

The TrekGuard Waterproof Boot features a waterproof membrane carefully sewn into the upper to keep feet dry. It has both toe cap and midsole protection made from lightweight, metal free composite material, plus a ladder grip sole unit with a transverse profile that gives added stability when climbing or descending ladders. The hardwearing, dual density PU sole is shock absorbent, anti-slip, anti-static and fuel oil resistant.

CERTIFICATION/MARKINGS

EN ISO 20345:2022 is an internationally recognised standard which specifies requirements for safety footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example S3L FO SR. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as protective toe cap, waterproof uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
