SBU10 WATER RESISTANT CHUKKA BOOT

DESCRIPTION

The S3 Chukka safety boot is a classic style that is used in a wide and varied range of industries. Featuring a water resistant microfibre upper with padded ankle support, it has both steel toe cap and midsole protection plus a hardwearing, dual-density PU sole that is shock absorbent, anti-slip, anti-static and fuel oil resistant.

SIZES

UK 3-13

STANDARDS

EN20345 S3 FO SR

KEY FEATURES

- Water resistant microfibre upper with padded ankle
- Steel toe cap and protective midsole
- Dual density shock absorbent, anti-slip, anti-static and fuel oil resistant PU sole
- Energy-absorbing heel reduces foot fatigue

- Water resistant microfibre upper
- PU/PU sole
- Steel toe cap
- Steel midsole

TYPICAL INDUSTRIES

- Construction
- Engineering
- Facilities management
- Highways
- Rail
- Utilities
- Airport & logistics

CERTIFICATION/MARKINGS

EN ISO 20345:2022 is an internationally recognised standard which specifies requirements for safety footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example S7L FO HRO SR. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as protective toe cap, water-resistant uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
