

SAFETY DATA SHEET

SECTION 1. IDENTIFICATION OF THE MIXTURE AND COMPANY

1.1 Greenshield Antibacterial Disinfectant Wipes

1.1.1 Product Reference

L1068

1.2 The mixture is used as a Wipe.

1.3 Manufacturer/Distributor:

Saraco Industries
Egerton Street, Farnworth
Bolton
BL4 7ER

1.4 Emergency Telephone :

National Emergency telephone number: For information or to report a poisoning incident contact the National Poisons Information Centre (01 8092166) 8am – 10pm every day.

SECTION 2: HAZARD IDENTIFICATION

2.1 Classification of the mixture

Classification (Regulation (EC) No 1272/2008)

Aquatic Chronic Category 3

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictogram

None

Signal Word

None

Hazard statement

H412 Harmful to aquatic life with long-lasting effects

Precautionary Statements

P273 Avoid release to the environment

P501 Dispose of contents/container to a licensed facility in accordance with national regulations

2.3 Other hazards
None.

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

3.1 Substances
Not applicable**3.2 Mixtures**

Ingredient name	CAS No.	%(w/w)	Classification to 1272/2008 & Hazard phrases
Quaternary ammonium compounds, benzyl-C12-16-alkyldimethyl, chlorides	68424-85-1	>0.1% - ≤ 1.0%	Acute Toxicity (Oral) Category 4 H302 Skin Corrosion Category 1 H314 Eye Damage Category 1 H318 Acute Aquatic Category 1 H400 (M-10) Aquatic Chronic Category 1 H410 (M-1)
Propylene Glycol	57-55-6	>0.1% - ≤ 1.0%	Not classified

See Section 16 for full list of H-statements used in sections 2 & 3

SECTION 4: FIRST AID MEASURES

4.1 First Aid Instructions

General: If symptoms persist, call a Doctor.

Eyes: If this product comes in contact with eyes: Wash out immediately with water. If irritation continues seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

Skin: If skin or hair contact occurs: Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.

Ingestion: Immediately give a glass of water. First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Inhalation: If fumes, dust, or combustion products are inhaled remove from contaminated area. Other measures are usually unnecessary.

4.2 Symptoms and effects, both acute and delayed

Inhaled: The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.

Skin Contact: The material is not thought to produce adverse health effects or skin irritation following contact (as classified by EC Directives). Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.

Eye: Although the product is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).

Chronic: Long-term exposure to the product is not thought to produce chronic effects adverse to health (as classified by EC Directives); nevertheless, exposure by all routes should be minimised as a matter of course.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing Media

Suitable: Use water spray, alcohol resistant foam, dry chemical, or carbon dioxide. Keep containers and surroundings cool with water spray.

Unsuitable: No full water jet.

5.2 Special Hazards

Do not use a solid water stream as it may scatter and spread fire.
If heated to decomposition may release CO_x and complex hydrocarbons.

5.3 Advice to firefighters

Special protective equipment for fire fighters.
In the event of fire, wear self-contained breathing Apparatus.

Further information

Not considered a significant fire risk, however containers may burn. Cool endangered containers or product with water spray jet. In the event of fire do not breathe fumes.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions:

Glasses: Chemical goggles.
Gloves: When handling larger quantities.
Respirator: Type A-P Filter of sufficient capacity.

6.2 Environmental Precautions

Environmental Precautions: Prevent the material from entering drains or water courses. Advise authorities if spillage has entered water course or sewer.

Minor Spills: Clean up all spills immediately. Avoid breathing dust and contact with skin and eyes. Control personal contact with the substance, by using protective equipment. Contain and absorb spill with sand, earth, inert material, or vermiculite. Wipe up. Place in a suitable, labelled container for waste disposal.

Major Spills: Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Control personal contact with the substance, by using protective equipment. Prevent spillage from entering drains, sewers, or water courses. Recover product wherever possible. Put residues in labelled containers for disposal. If contamination of drains or waterways occurs, advise emergency services.

6.3 Methods and materials for containment and cleaning up

Spill response: Contain and absorb using earth, sand, or other inert material. Transfer into suitable containers for recovery or disposal.

6.4 References to other sections.

For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see Section 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Limit all unnecessary personal contact.

Wear protective clothing when risk of exposure occurs.

Use in a well-ventilated area.

Avoid contact with incompatible materials.

When handling, **DO NOT eat, drink, or smoke.**

Keep containers securely sealed when not in use.

Avoid physical damage to containers.

Always wash hands with soap and water after handling.

Work clothes should be laundered separately.

Use good occupational work practice.

Observe manufacturer's storage and handling recommendations contained within this SDS

Atmosphere should be regularly checked against established exposure standards to ensure safe working conditions are maintained.

7.2 Conditions for safe storage

When handling raw bulk wear safety glasses, PVC gauntlets and protective overalls.

Keep out of the reach of children.

Storage area should be dry, well ventilated, and cool.

7.3 Specific end use

Product is designed as a wipe for home use and is safe when used in accordance with manufacturer's instructions.

SECTION 8: CONTROL PARAMETERS

8.1 Control Parameters

Components with workplace control parameters:

Occupational Exposure Limits Ireland

Occupational Exposure Limits Ireland						
Component	Cas No.	Workplace Exposure Limits				Note
		Long-term exposure limit (8-hr TWA reference period)		Short-term exposure limit (15-minute reference period)		
		ppm	mg.g-3	ppm	mg.m-3	
Propane-1,2-diol total (vapour and particulates)	57-55-6	150	470	-	-	-
particulates		-	10	-	-	-

8.2 Exposure Controls

8.2.1 Appropriate engineering controls

Ventilation: Keep area well ventilated.

8.2.2 Personal Protection:

Eye Protection: Safety glasses with side shields Chemical goggles.

Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lens or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly.

Hand Protection: Wear general protective gloves, e.g. light weight rubber gloves. The selection of the suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Where the chemical is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. The exact break through time for substances has to be obtained from the manufacturer of the protective gloves and has to be observed when making a final choice.

Suitability and durability of glove type is dependent on usage. Important factors in the selection of gloves include frequency and duration of contact, chemical resistance of glove material, glove thickness and dexterity Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent). When prolonged or frequently repeated contact may occur, a glove with a protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is

recommended. When only brief contact is expected, a glove with a protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. Contaminated gloves should be replaced. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly

Respiratory Protection: Respiratory protection if there is a risk of exposure to high vapour concentrations.

Body protection: No special equipment needed when handling small quantities.

OTHERWISE: Overalls. Barrier cream. Eyewash unit.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

(a) Appearance:	Wipe
(b) Colour:	Characteristic
(c) Odour:	Perfumed - Citrus
(d) Odour threshold	Not determined
(e) pH	5.0 – 7.0
(f) Melting Point	Not determined
(g) Initial Boiling Point	
and boiling range	Not determined
(h) Flash Point	Not determined
(i) Evaporation rate	Not Applicable
(j) Flammability	Not determined
(k) Upper/lower flammability	
or explosive limits	Not determined
(l) Vapour pressure	Not determined
(m) Vapour density	Not determined
(n) Specific gravity @20°C	Not determined
(o) Solubility	Not determined
(p) Partition coefficient	
n-octanol/water	Not Applicable
(q) Auto-ignition	
Temperature	Not Applicable
(r) Decomposition temperature	Not determined
(s) Viscosity	Not determined
(t) Solids content	Not determined
(u) Water	Not determined

SECTION 10: STABILITY AND REACTIVITY

- 10.1 Reactivity**
Mixture is not reactive
- 10.2 Chemical stability**
Mixture is stable under normal conditions
- 10.3 Possibility of hazardous reactions**
Mixture is unlikely to undergo any hazardous reactions
- 10.4 Conditions to avoid**
No data available

10.5 Incompatible materials

No data available

10.6 Hazardous decomposition products

No data available

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects**Acute Toxicity**

Not determined

Skin corrosion/irritation

Not determined

Serious eye damage/eye irritation

Not determined

Respiratory or skin sensitisation

Not determined

Germ cell mutagenicity

No data available

Carcinogenicity

No data available

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeat exposure

No data available

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Harmful to aquatic life with long lasting effects. Calculation method.

Toxicity to fishMortality LC50 - Salmo gairdneri - not determined
Method OECD Test Guideline 203**Toxicity to Daphnia and other aquatic invertebrates**

Immobilisation EC50 - Daphnia magna (Water flea) - not determined

12.2 Persistence and degradability

Biodegradability Biotic/Aerobic - not determined.

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Endocrine disrupting properties

This product does not contain substances which are identified as having endocrine disrupting properties

12.7 Other adverse effects

No data available

Biochemical Oxygen Demand (BOD)

Not determined

Chemical Oxygen Demand (COD)

Not determined

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Dispose of to a licensed disposal company in accordance with local regulations.

Disposal Method: When disposing of waste or surplus amount avoid contact with eyes, mouth & skin. Do not mix waste with other materials.

Do not dispose of bulk quantities directly into drains. Single units can be disposed of with other household refuse.

13.2 Contaminated packaging

Dispose of as unused product.

Refer to Section 8.2.2 for details of Personal Protective Equipment

SECTION 14: TRANSPORT INFORMATION

14.1 UN Number

None

14.2 Proper shipping name

None

14.3 Transport hazard class

None

14.4 Packing group

None

14.5 Environmental hazard

None

14.6 Special precautions for user

No data available

SECTION 15: REGULATORY INFORMATION

This safety datasheet complies with the requirements of Regulation (EC) No. 1272/2008

15.1 Safety, health, and environmental regulations/legislation specific for the substance or mixture

No data available

15.2 Chemical Safety Assessment

For this product, a chemical safety assessment was not carried out

SECTION 16: OTHER INFORMATION

Pictogram

None

Signal Word

None

Full text of H-statements referred to under sections 2 and 3:

H302 Harmful if swallowed

H314 Causes severe skin burns and eye damage.

H318 Causes serious eye damage

H400 Very toxic to aquatic life

H410 Very toxic to aquatic life with long-lasting effects

H412 Harmful to aquatic life with long-lasting effects

Full text of P-statements referred to under section 2:

P273 Avoid release to the environment

P501 Dispose of contents/container to a licensed facility in accordance with national regulations

Supplemental Hazard Statements

None

Reference No: L1068
